What is Flow Genius?

- Intuitive and user-friendly conversational bot creation platform for businesses.
- Enables building custom chatbots without coding or technical knowledge.
- Can handle customer queries, process transactions, and perform other functions.
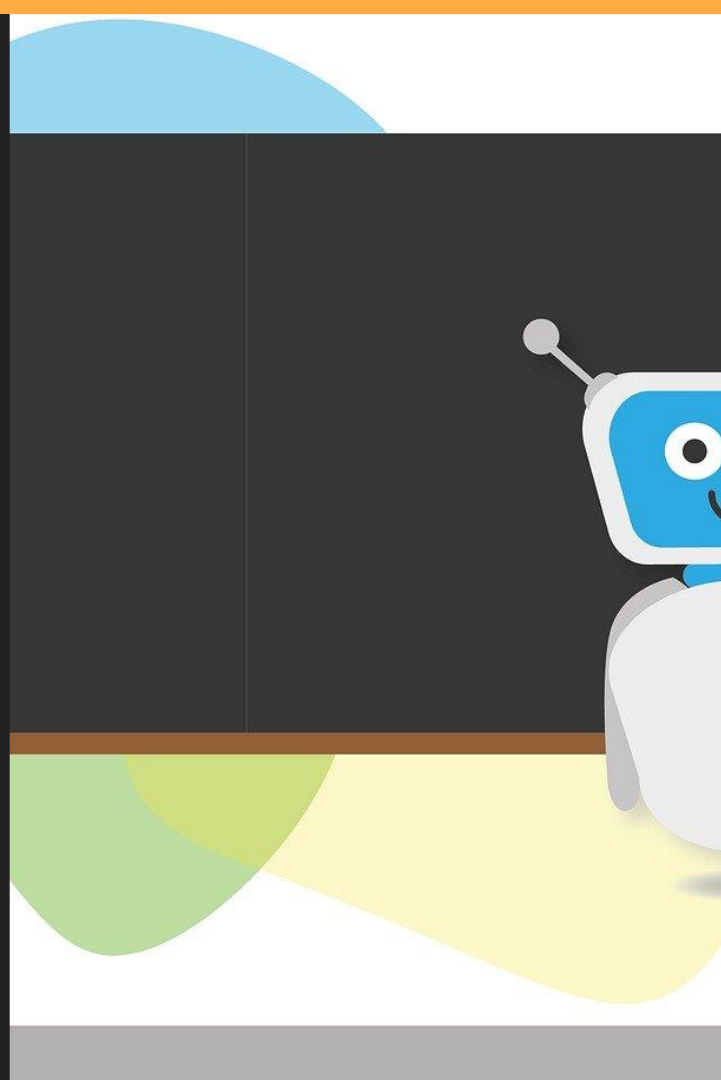

Intuitive and User-Friendly Platform

- Designed to be simple and easy to use, even for non-technical users.
- Features a drag-and-drop interface and pre-built templates for quick chatbot creation.
- Can handle a wide range of customer queries and tasks.

Versatile Functionality

- Businesses can create chatbots that perform various functions, from handling customer queries to scheduling appointments and more.
- Ideal for businesses of all sizes and industries.

Seamless Integrations

- Flow Genius integrates with popular messaging platforms and business tools, such as Facebook Messenger, Slack, and Zapier.
- Makes it easy for businesses to automate workflows across multiple tools.

Analytics and Reporting Tools

- Provides detailed analytics and reporting tools to track bot performance, optimize conversational strategies, and improve customer engagement.
- Helps businesses save time, increase efficiency, and boost customer satisfaction.

Time and Cost Savings

- Automating customer support and engagement processes with Flow Genius saves time and reduces costs associated with manual labor.
- Enables staff to focus on other essential tasks, such as sales and marketing.
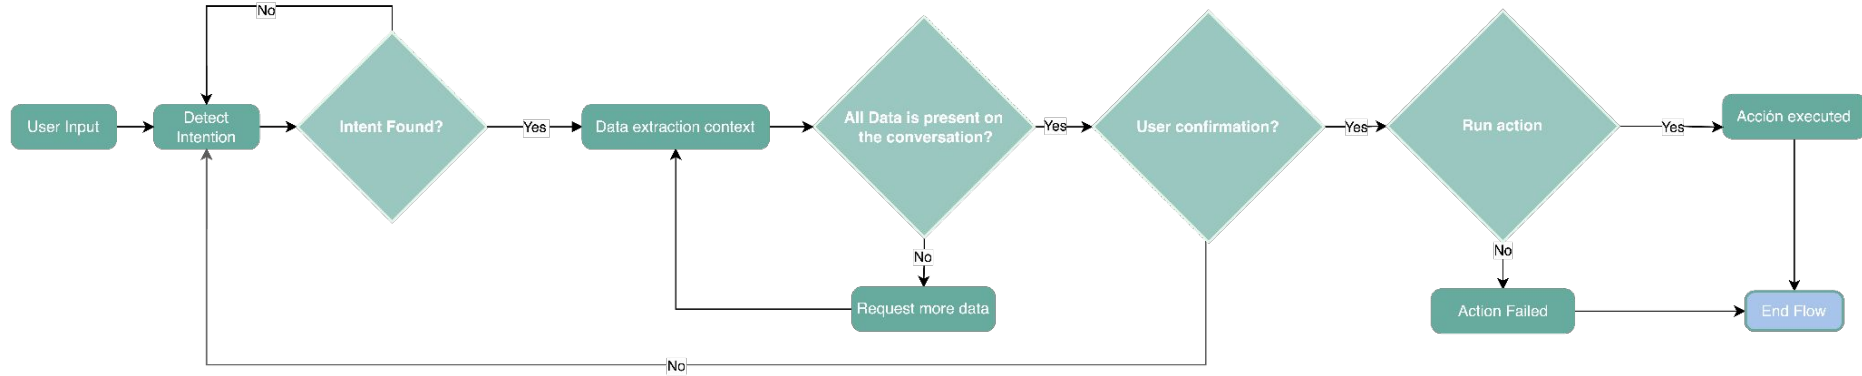

Getting Started with Flow Genius

- Simple and quick sign-up process.
- Onboarding assistance available for new users.
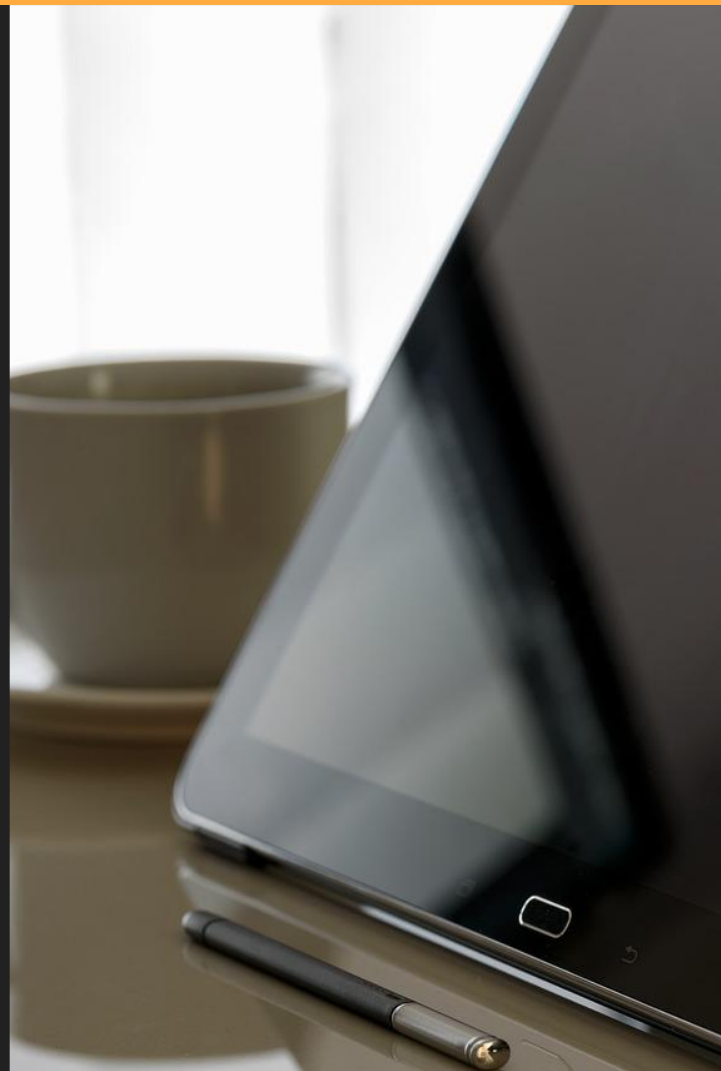

Flow Genius internal

Business Market

Based on MarketsAndMarkets the market size for conversation AI is expected to increase from USD 10.7 billions in 2023 to USD 29.8 billions in 2028

Potential Markets:

- BFSI
- Health
- Education
- Turism

Competitors

- Dialogflow - A Google-owned platform that enables businesses to build natural language processing-powered chatbots for their websites, mobile apps, and other messaging platforms.

- Landbot.io - A chatbot builder that offers businesses the ability to create interactive chatbots with customizable templates, advanced integrations, and easy deployment options.
